

Veterinary Assistant

If you wish to join an ambitious team where your qualifications can shine and grow, and your skills are valued – then you could be our new colleague.

In order to strengthen our daily operations and cooperation internally as externally, we are looking to hire a conscientious and skilled Veterinary Assistant with a positive and proactive attitude. The position is fixed-term employment for 1 year.

Your main tasks will be:

- Support to our Veterinary team
- Structuring, planning, conducting and re-evaluate procedures in relation of testing animals
- Participation in collection of flush samples, blood samples and DNA samples
- Animal registrations and registration of animal movements
- Handling of import semen

You will work together with Veterinarians, Export coordinators and will be reporting to our Chief Veterinarian. The main office is located in Assentoft, close to Randers.

Your qualifications:

- Agricultural practice
- Excellent knowledge of animal husbandry
- Medication/injection course
- Experienced user of Office packages
- Social skills and ability to handle cultural differences, internally and externally
- First class communication skills, able to operate professionally and effectively at all levels
- English language at fluent level – oral and written.

We expect you to have:

A self-motivating and result-oriented mindset as well as a strong cross functional understanding. Strong administration skills, structured and systematic, but also prepared for change. Motivated by a high pace, have a high energy-level and work determinedly and efficiently.

We offer you:

An exciting job with opportunities for professional and personal development. We value initiative, enthusiasm, responsibility and the right balance between creativity and quality in all solutions.

For more details, please contact: Chief Veterinarian, Karina Elkjær, Phone +45 93 63 20 10.

Applications with appendices should be sent to: application@vikinggenetics.com.

VikingGenetics is the world-leading provider of bovine genetic products and solutions, co-operatively owned by 20,000 dairy and beef farmers in Denmark, Sweden and Finland. Our unique combination of breeding for health traits as well as production has led to a position as domestic market leader in the Nordic countries and strong player globally. VikingGenetics' breeding programme is designed to increase the profitability of our customers, some of the world's leading farmers. We employ 155 people in Denmark, Finland, Sweden, Australia and United Kingdom.
